<u>General Guidelines</u>

1. Feel free to use any technology with which you're comfortable to build the website, as long as you can share the <u>underlying codebase</u> with us for proper review.

2. Follow the best practices for building websites such as reusing classes, mobile compatibility etc.

3. If you're sharing a github repo, please share instructions in README.md file on how to build and run the website on a local environment.

4. The logos should move from right to left in a carousel format.
